### **Exhibition „naturectecture“ in Istanbul**

The exhibition „NATURTEKTUR / naturectecture“ will be shown in Istanbul in November 2010. Within the culture capital year of the Turkish metropolis, the Chamber of Architects of North Rhine-Westphalia will present the large-sized panels illustrating the future of landscape architecture in Europe in the Chamber of Architects of Istanbul.

„naturectecture“ covers different aspects of the challenges landscape architecture is presently facing in North Rhine-Westphalia and Europe. 14 themes, such as new concepts for inner-city public spaces, conversion of former industrial estates and the management of energy landscapes, are analyzed by means of photos and texts.

„naturectecture“ was conceived as a traveling exhibition. After several venues within architectural and building festivals in South Korea in September und October 2010, the exhibition will be opened in the Turkish Chamber of Architects of Istanbul on November 26, 2010. Organisation of the event was provided by Ercan Agirbas, a Neuss architect who was born in Turkey, taking care of a vivid cultural exchange between German and Turkish architects. The exhibition will be presented until December 10, 2010, *ros*
